Programing and Scripting Languages / Technologies	JavaScript, React Js, Node Js, JQuery, Ajax, HTML5, CSS3, SCSS, Generic SQL Programing, Template Engine(Smarty), Bootstrap
Database	Mysql
Webservices	JSON / XML, REST APIs, SOAP
Payment Gateway(s)	Paypal, PayU, Stripe, CCavenue, M-Pesa
Version Control Tools	GIT
IDE	Webstrom, VS code, Atom, IntelliJ

Work History

Sr Software Engineer, Intuit

01/05/2020 to present

Description :

Intuit Inc. is an American business and financial software company that develops and sells financial, accounting, and tax preparation software and related services for small businesses, accountants, and individuals.

I'm working as a FE developer and developed several modules with a proper handshake with BE team. All BE functionalities are written in Java, MySQL and as a FE developer I worked on React js, Redux, Redux Thunk, Redux Saga, ApolloClient, GraphQL, Webpack, Babel to build different FE components. Using CI/CD for development and deployment

Description :

- Involved directly with Intuit on requirement gathering and status update on daily scrum.
- Build the Licensing App independently all of its module Dashboard model, Licensing Request module, Batch License Module, Bulk upload module, License Lookup Module.
- Worked on Authz module to manage Reseller and supply chain activity.
- Worked with multiple Icp widget which are used in QBO and Turbo Tax.
- Build AutoPay module in myaccount project to enroll AutoPay.
- Used GIT (Github) for daily work commit, push and pull request

Project:

Licensing 2.0 will provide a new Licensing UI application accessed through Intuit SSO and backed by ICP Catalog and Entitlement Services. This UI will provide all design time capabilities for a supply chain analyst to provision licenses across channels for multiple manufactures and channels.

Technologies: React Js, Redux, Redux Thunk, Redux Saga, GraphQL, Javascript, Es6, Jest, Enzyme, HTML5, CSS3, SASS, Webpack, GIT, MySQL, CI/CD.

React Developer, ClickMail Solutions pvt.ltd.

1/04/2018 to 31/03/2020

Description :

ClickMail sells and customizes enterprise Email Service Provider (ESP) Solutions.

We deliver platform-specific technology expertise that makes enterprise ESPs perform at their peak. Our clients include e-commerce retailers, online gaming companies, large associations and consumer electronics companies that need advanced email technologies and strategies to drive relevance and ROI. I'm working as a FE developer and developed several modules with a proper handshake with team. All BE functionalities are written in Perl, MySQL and as a FE developer I worked on Node.js, Express js and React js, Redux, Flux, Immutable Js to build different FE components. Using CI for development and deployment.

Project:

iPost puts the power of customer data and email in your hands with a powerful, easy-to-use platform that integrates simply with other best-in-class marketing tools—empowering marketers and driving immediate ROI.

Technologies: Node.js, Express Js, React Js, Redux, Flux, JavaScript, Es6, Jest, Enzyme Immutable Js, HTML5, CSS3, SASS, Gulp, Webpack, GIT, MySQL.

**Full Stack Developer, Muvi Entertainment pvt.ltd.
to 29/03/2018**

15/01/2016

Description:

Muvi is a PaaS-based Video Streaming solution that enables content producers and owners to have and operate their OTT Multi-Screen Video Streaming service right off the bat. The platform allows users to customize their video streaming service to reflect their brand, and works completely in accordance with their business and operational rules. The best part about it is that both medium and large business can benefit from its features, as there is a separate plan for each of them.

Project: Muvi a Paas-Based Hybrid Video streaming, Audio streaming and Ecommerce cart CMS.

Technologies: PHP, MySQL, HTML5, CSS3, React Js, Javascript, JQuery, Ajax, AWS etc.
